

# MI 720 Session #9

## Topics

- ◆ *Justifying IT initiatives (Moore Medical)*
- ◆ *Mini-Lecture: Business Value of IT*

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 1

## Justifying IT Investments

Let's suppose...

... You've done the basics

- You've framed the problem/opportunity right
- You've identified all the reasonable alternatives
- You've narrowed your focus to best alternatives

... and there is not an easy answer

- At least one alternative looks promising
- No alternative is an obvious strategic "must have"
- No alternative is obviously the best/obviously pays off

*Now what?*

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 2

## Justifying IT Investments: Step 1

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 3

## Costs/Benefits Matrix

	Tangible	Intangible
Costs	<ul style="list-style-type: none"><li>• Hardware, software, telecom, services,</li><li>• Personnel (development, implementation, training)</li></ul>	<ul style="list-style-type: none"><li>• Lower morale?</li><li>• Disruption of operations?</li><li>• Reverse of intangible benefits...</li></ul>
Benefits	<ul style="list-style-type: none"><li>• Increased cash flows</li><li>• Increased productivity</li><li>• Lower operational costs</li><li>• Reduced workforce</li><li>• Lower expenses</li><li>• Lower facility costs</li></ul>	<ul style="list-style-type: none"><li>• Org. flexibility, more timely info, better decisions, org. learning, employee good-will, job satisfaction, client satisfaction, corporate image....</li></ul>

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 4

## Justifying IT Investments: Step 2

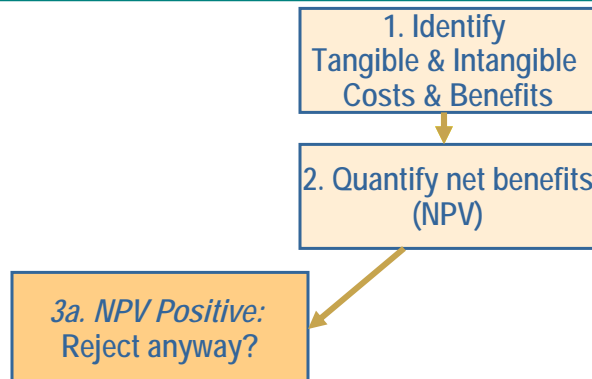

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 5

## Justifying IT Investments: Step 3a

- Other projects are even better?
- High risk of failure that can't be managed away?

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 6

## Kinds of IT Investment Risks [Clemons 1991]

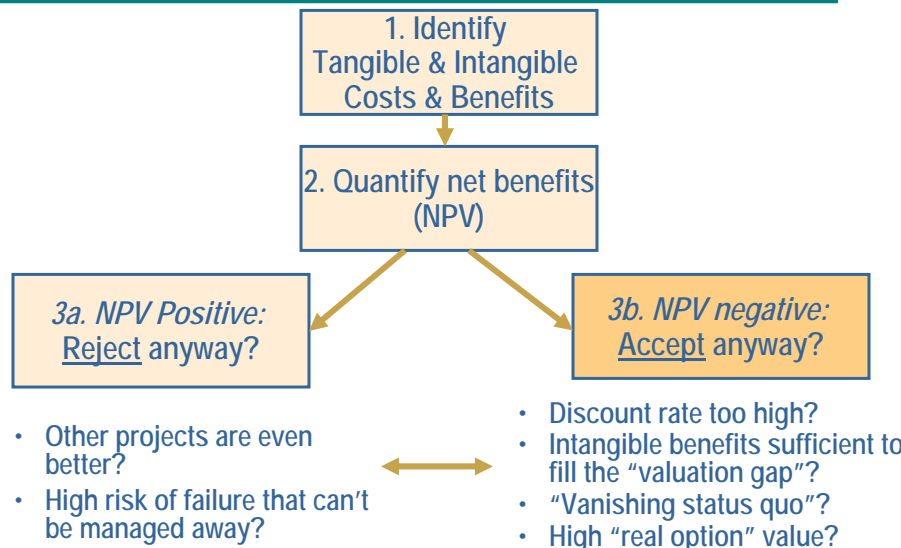

- ◆ **Financial risk:** We can't afford it
- ◆ **Technical risk:** It can't be done
- ◆ **Project risk:** We can't do it (too complex, too big, too hard)
- ◆ **Functionality risk:** What the user wants or needs may change
- ◆ **Systemic risk:** The world might change in an adverse way because we did the system (*"Law of unintended consequences..."*)

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 7

## Justifying IT Investments: Step 3b

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 8

## The “Vanishing Status Quo” [Clemons 1991]

- ◆ Cash flow analyses need a baseline for comparison, e.g., how things are now (the “status quo”)
  - What savings will there be over the existing cost structure?
  - What incremental net revenues will there be over existing revenues?
- ◆ But what if the status quo will vanish if you don’t do the project?

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 9

## Real Options

- ◆ Formal definition of a real option:
  - The right, but not the obligation, to take ownership of some real world asset
- ◆ Real options in an IT context:
  - A small investment that gives information about the payoffs of a larger follow on investment
  - The opportunity to redirect the path of a project based on new information

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 10

## Common types of Real Options

- ◆ **Deferral Option:** A decision on whether to invest can be deferred for some period without imperiling the potential benefits
- ◆ **Abandon Option:** A project can be terminated midstream and still redeploy remaining project resources
- ◆ **Stage Option:** A project can be divided into distinct stages where pursuit of each stage is contingent on a reassessment of costs and benefits at the time the preceding stage is completed
- ◆ **Strategic Growth Option:** An initial baseline system opens the door to pursue a variety of potential follow-on opportunities

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 11

## Summary: Thinking Systematically about Justifying IT Investments

- ◆ Do a thorough qualitative analysis:
  - What problem are we really trying to solve?
  - What are different ways to solve it? What system features would be useful?
  - What are our organizational capabilities?
  - Is IT investment the best way to solve the organizational problem?
- ◆ Identify the most promising alternatives
  - Identify if there is an “easy answer”
- ◆ If there is no easy answer, evaluate each option
  1. Identify tangible & intangible costs & benefits
  2. Quantify net benefits (e.g., NPV)
  3. Look for the exception cases (Accept a negative NPV project? Reject a positive NPV project?)

Slide 13

## MI 720 Session #9

### *Topics*

- ◆ *Justifying IT initiatives (Moore Medical)*
- ◆ *Mini-Lecture: Business Value of IT*

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 14

## The IT “Productivity Paradox”

- ◆ The paradox: An explosion of IT investment in the 1970's and 1980's accompanied by a *decrease* in aggregate productivity growth

*“We see the computer age everywhere except in the productivity statistics” – Robert Solow, 1987*

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 15

## Academic Studies of IT Business Value

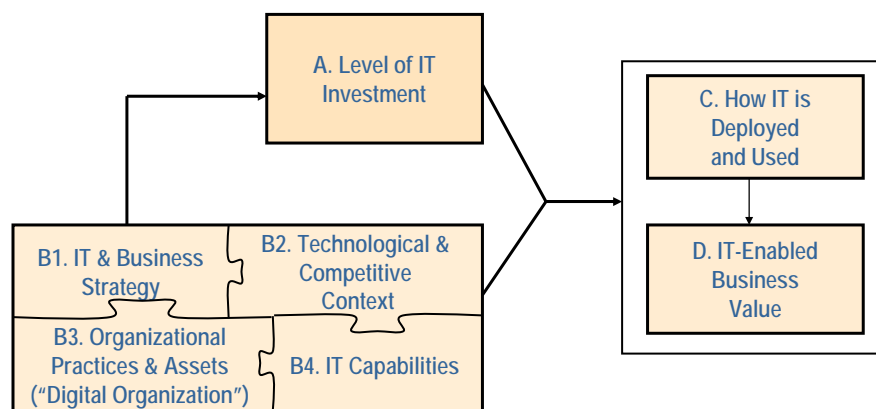

- ♦ IT capital investments (measured as IT HW spending) have an ROI of over 50% (as implied by the estimated multi-factor productivity contribution of IT capital) [Brynjolfsson & Hitt 1996]
- ♦ Firms that invest heavily in IT (measured as all IT spending) have a significantly higher Tobin's Q [Bharadwaj et al 1999]
- ♦ Firms with high IT capabilities (rated by InfoWeek editors) outperform control sample on firm-level cost (e.g. COGS, SGA) & performance (ROA, ROS) measures [Bharadwaj 2000]
- ♦ Hospitals with greater IT usage (total disk I/O) have better operational performance (mortality rates, cost per stay) [Devaraj & Kohli 2003]
- ♦ Abnormal market returns occur for firms announcing IT for strategic transformation in industries transformed by IT [Dehning et al 2003]

03/021/2007

Slide 16

## Business Value of IT Framework

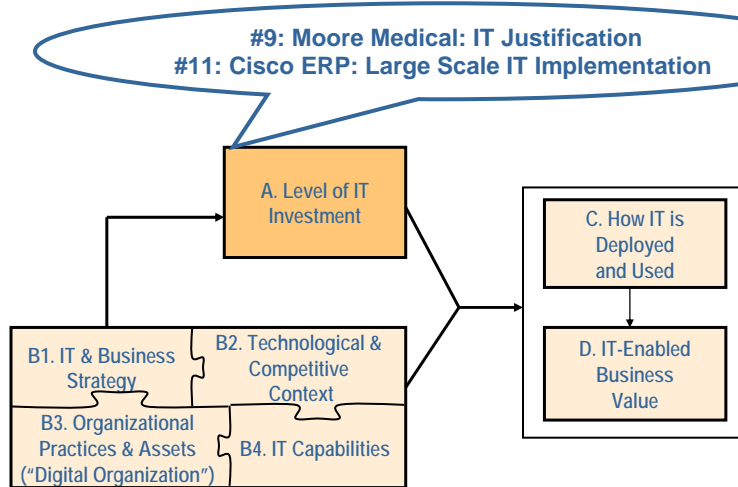

*What key factors affect the level of business value produced by a given level of IT investment?*

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 17

## BV Framework: A. Level of IT Investment

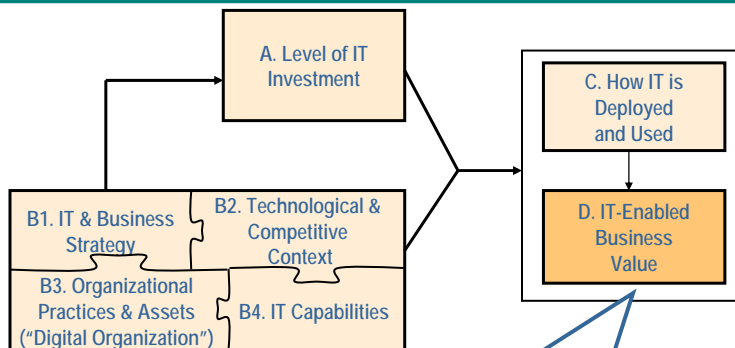

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 22

## BV Framework: D. IT Enabled Business Value

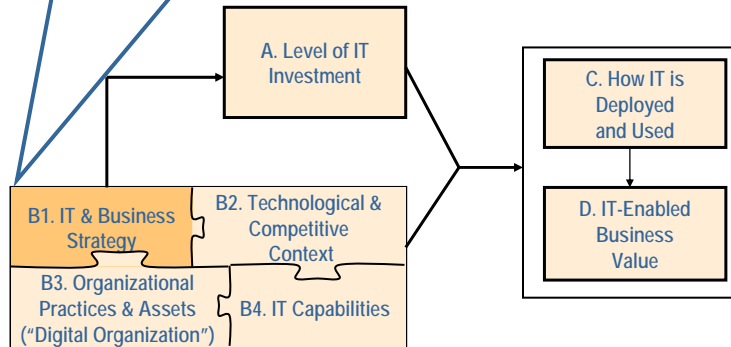

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 23

## BV Framework: B1. IT & Business Strategy

- #3: Netflix: IT Enabled Business Models
- #4: Dell: Using IT for Competitive Advantage
- #5: Apple: Navigating Industry Transitions

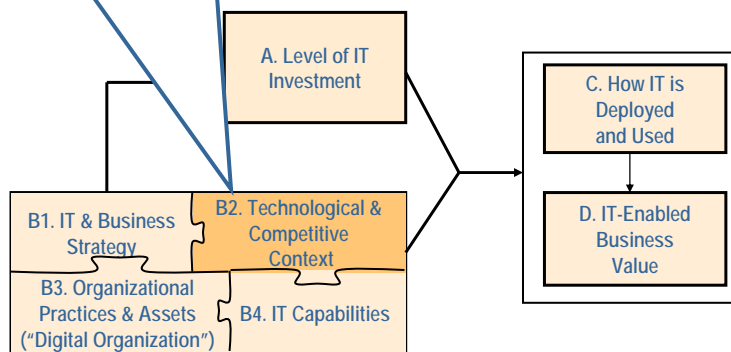

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 24

## BV Framework: B2. Tech & Competitive Context

- #1: Friedman: Ten World Flatteners
- #2: Five Distinctive Characteristics of IT
- #4: Dell: IT for Competitive Advantage

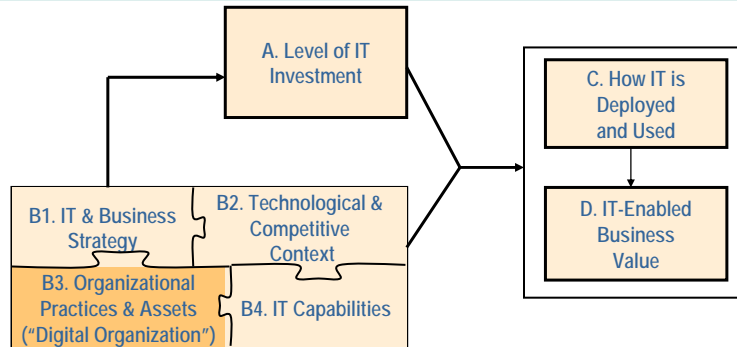

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 25

## BV Framework: B3. Org. Practices & Assets

#6: Harrah's: Competing on Analytic Capabilities

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 26

## B3. Org. Practices & Assets (cont.)

- ◆ IT is embedded in a cluster of related innovations that comprise the "digital organization":
  - Automation of routine tasks
  - Highly skilled labor
  - Decentralized decision making
  - Improved info flow vertically & laterally
  - Strong performance-based incentives
  - Increased emphasis on training and recruitment

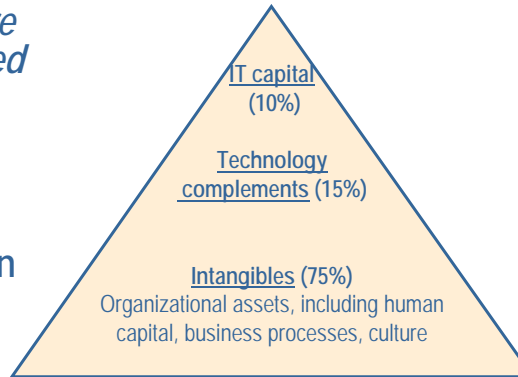

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 27

## B3. Org. Practices & Assets (cont.)

- "For every dollar of IT hardware capital...there are up to \$9 of IT-related intangible assets..." [Brynjolfsson 2003]
- Only 20% of the firms studied by Brynjolfsson are "digital organizations" What's wrong with the other 80%?

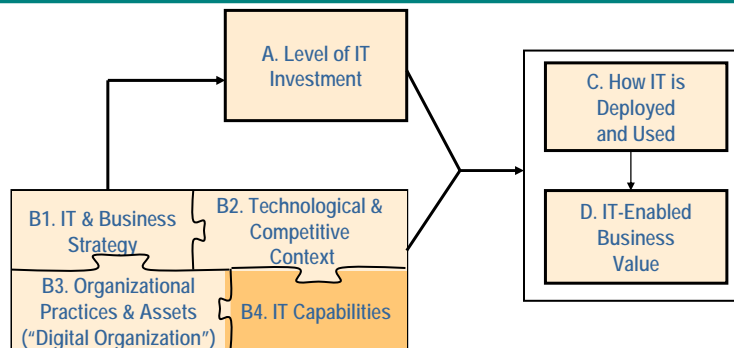

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 28

## BV Framework: B4. IT Capabilities

#8: Pinnacle: IT Delivery Strategies  
 #9: Moore Medical: IT Justification  
 #11: DKW: IT Adoption and Implementation  
 #11: Cisco ERP/Large Scale IT Implementation

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 29

# What are IT Capabilities?

- ◆ An effective IT capability:
  - *The ability to control IT-related costs, deliver systems when needed, and effect business objectives through IT implementations* [Ross et al 1996]

## The Schneider National Story [Ross et al 1996]

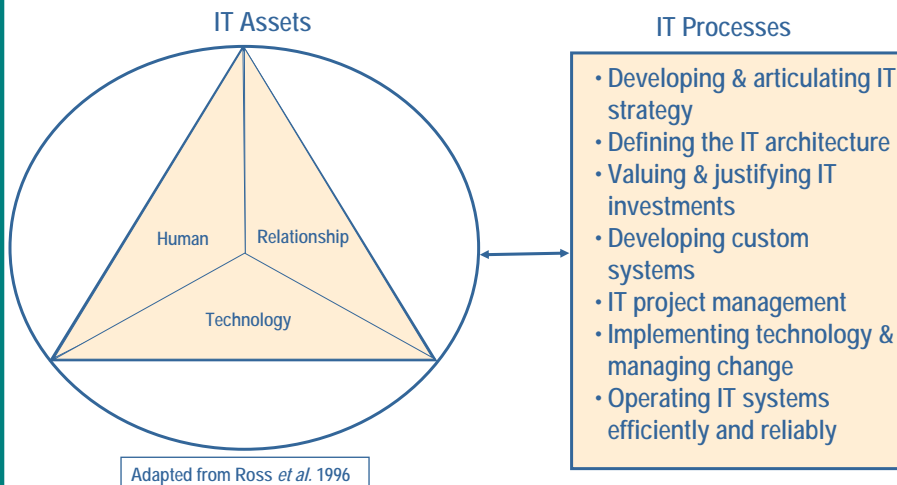

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 30

# BV Framework: IT Capabilities

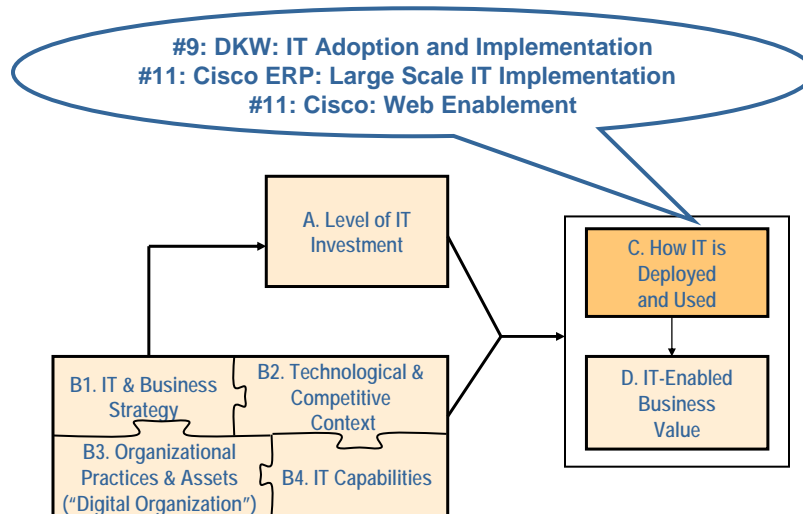

Adapted from Ross *et al.* 1996

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 31

## BV Framework: C. How IT is Deployed

03/021/2007

Robert G. Fichman – MI 703 Computer Information Systems

Slide 32

## Conclusions

- ◆ *Business value (D)* does not automatically flow from *IT investments (A)*
  - Investment has to be joined with favorable positions on four related organizational elements (B1-B4)
  - The resulting IT systems have to actually be assimilated, and joined with initiative-specific organizational changes (C)
- ◆ Certain general *organizational practices and assets (B3)* complement most kinds of IT investment
- ◆ IT Capabilities (B4) can be judged by *results*, but they are *driven* by valuable IT assets and valuable IT processes
  - *Non-IT managers* play a crucial role in building and sustaining valuable IT assets and processes

03/021/2007
