1. What are the strengths of this course?

* The subject matter is very useful to life after college.
 * learn a lot about accounting and get a good grasp of all concepts

* Professor soo

* Professor Soo was an amazing teacher. It was a very challenging class and required a lot more effort than others but he was very lenient about handing things in and accepting things late. He really wants students to understand the material and all the work he gives is only for our benefit. He also knows his tests are hard so he give a pretty nice curve. Definitely one of my favorite classes so far.

* This class requires LOTS of time to do well in the class, but it is definitely worth it because you learn so much and you actually retain and understand everything. He is absolutely great in explaining the material and is willing to go over it as many times as you need him too.

* The instructor was very knowledgeable.

* His class is generally know as the most difficult financial accounting class, and indeed it was. That's why I liked it because I feel well prepared.

* The professor really knows the content and is clearly passionate about the subject. The sample exams and power points that he made are great tools for success in the course.

* Professor Soo is very understandable and helpful

* Prof. Soo knows everything that he is teaching. He knows the subject by heart and tries his best to explain it to everyone.

* A very good introduction to financial accounting.

* Professor Soo is a great teacher at accounting, and his lectures really helped me to do well in his class. Furthermore, he knows a lot about accounting.

* Professor Soo is a very good professor. The information was very interesting and he shows excitement. Practice quizzes and exams are very helpful.

* powerpoints help explain subject matter

* Professor Soo is clearly very enthusiastic about his class. He clearly wants all the students to do well and is available all the time if we need help.

* Repetition is key to learning accounting and it is emphasized in this course well with homework assignments.

* Professor is very knowledgeable in the subject matter. Explained things very clearly and kept students engaged.

* Leaned a lot

2. How could the instructor improve the course?

* The examination process NEEDS to be changed.
* make the tests and quizzes less challenging

* Make it not so impossible

* Nothing really. He was always very prepared and knows his stuff better than anyone I know. He's one of the smartest people I know for sure.

* Make quizzes and exams shorter in length

* Make online homeworks due soon after the material is learned.

* I liked his style.

* If he assigned the homework earlier due dates instead of having the bulk of them due in December, it would give more of an incentive for students to do homework earlier.

* The class could be a little more engaging. I sometimes found it hard to focus because it was not that interesting.

* more straightforward online problems, they're too time consuming and aren't like problems we'd have on a test. Seemed like a waste of time...too much busy work to do accounting on a computer

* Its a class with pretty dry material, but i dont think much can be done about that.

* The tests were a bit long. I've never encountered a 3 hour midterm before. Other than that, I liked the way that quizzes were spaced periodically.

* Make tests shorter.

* no

3. Would you recommend this course to other students, majors etc.? Why or why not?

* I would recommend the course but not the professor. He is extremely difficult for no reason.

* yes, even though it is very difficult the amount you learn is worth taking the course

* no. too hard

* Yes if you're looking to go into accounting. You learn a lot of the basics but it is fairly challenging.

* Yes if you are an accounting major or just want to learn about accounting.

* Yes, you learn a lot.

* Yes, This class can be very helpful to accounting major students.

* Yes, it is a very interesting course, a bit over detailed and technical for non accounting majors.
* I would recommend this course to any student who has the slightest interest in accounting or finance, because the professor conveys so much passion and the subject matter is very interesting overall.

* I would tell other students to be ready to put a lot of effort into the class. But they will come out of the class very prepared.

* Yes, Prof. Soo does a great job of explaining difficult operations.

* Yes, because he is a great professor.

* Yes.

* We were taught the same curriculum/given the same tests as the honors students which made it extremely challenging

* yes

* Yes, Professor Soo will be your be chance of understanding this class, he is clear in his explanations and does his best to make us do well

* Yes. It is challenging, thorough and just.

* Yes I would recommend this course. It was a very difficult course but I gained a lot of knowledge regarding the subject, even relative to my friends in taking the same course with a different teacher.

* yes

4. Additional comments:

* Just because he's the head of the department does not mean he can have tests which take over FOUR HOURS LONG! This was not only the final but also a regular midterm as well! This is longer than the SAT and it's not acceptable for an introductory business class. The midterm was given out of class on a Friday afternoon starting at 4pm. A test of that length doesn't accurately represent your understanding because it becomes a test of endurance which isn't what the course is about. He is a good teacher but his standards are completely out of line!

* In regards to the online homework manager, I feel that it did not make a difference as I preferred doing it on paper. I feel setup wise made it unappealing to do it online. It was hard to get a perfect score if you made a small mistakes and you would have to do the whole set all over again.

* I would take his classes again.

* the online homework is not the best way to do exercises, it takes a lot of time to fill everything online and it is a bit tiring. I would prefer paper based homework.

* None

* no
