1) According to the “Majority Report” the morality of the individual use of contraception, natural or artificial, cannot be judged with certainty, but would depend on an analysis of the totality of the marriage relationship. True or False

2) According to the “Majority Report” there is always some level of at least ontic evil in any decision to practice contraception, artificial or natural. True or False

3) According to the “Majority Report” the development of scientific means to aid in control of the reproductive cycle, including artificial contraception, represents a positive contribution to married couples. True or False

4) According to the “Majority Report” an analysis based on “proportionality” would not be morally acceptable in choosing contraception, artificial or natural. True or False

5) According to the “Majority Report” the morality of a decision to use artificial contraception is not left to the married couple’s own conscience-based decision. True or False

6) According to Humanae vitae couples who practice artificial contraception are guilty of mortal sin and barred from the reception of the sacraments. True or False

7) According to Humanae vitae natural family planning is morally differentiated from artificial contraception because it is natural and organic, whereas artificial contraception is morally wrong because it is artificial. True or False

8) According to Humanae vitae it would be morally licit to use drugs that had a known contraceptive effect (such as a progesterone pill) as long as they were being taken for some other medical reason (like treating acne). True or False

9) According to Humanae vitae the morality of a decision to use artificial contraception is not left to the married couple’s own conscience-based decision. True or False

10) According to Humanae vitae priests, theologians, and other pastoral ministers have a serious duty to inform couples in confession and other venues that if they were to use artificial contraceptive devices they would be committing serious sin. True or False
