

## **Appendix Q. Bibliography on Societal Development**

**The modern university is a classified system of knowledge. Faculties work in special fields and do not (normally) crossover into other departments to create new fields of inquiry. The departmentalized university has its purpose and value but it also keeps students from looking into the larger picture. Students who want to go beyond departments and create a different order of thought must read literature outside their majors. A cross-disciplinary set of readings must be created for each new subject.**

**This bibliography is a start for students looking into the subject of *societal development*. The books and articles below are about linking the fields of political economy, organizational development, and civil society. This is what A Civil Republic is about.**
